Dear Dr. Henney:

I am writing to urge you to ban the use of human antibiotics to make livestock grow faster. The European Union has already acted, banning all growth-promoting uses of antibiotics that have a role in human medicine. Yet, the Food and Drug Administration is dragging its feet. While you study the problem, how many diseases will become untreatable? It is time to act on this matter of extreme importance. Thank you for listening to my concerns.

Sincerely,

P. L. McDaniel Jr.
